BIRUNI DESIGN

In Singapore, noise travels easily especially in HDBs, condos, offices, and shared commercial spaces. A beautiful space should not only look good, it should feel calm and private too. Biruni Design provides soundproofing solutions for homes and commercial spaces to reduce unwanted noise and improve comfort, focus, and privacy.

QUIETER ROOMS. CALMER LIVING.

SOUNDPROOFING SOLUTIONS, TAILORED TO EVERY BRIEF

Biruni Design develops practical acoustic solutions that are buildable, visually refined, and matched to the way the space is actually used.

BIRUNI DESIGN

Airborne noise

Common in Singapore, with voices, TVs, and traffic heard between spaces. We provide tailored soundproofing for better comfort, privacy, and focus.

Impact noise

With footsteps and furniture movement heard between spaces. We provide tailored soundproofing for better comfort and privacy.

Reverberation

Acoustic treatments that improve speech clarity and reduce harsh echo in active rooms.

Equipment noise

Targeted control for plant rooms, services, and background mechanical sound where needed.

Noise control

Reduce transfer between rooms and from external sources.

Privacy

Improve speech control for meetings, bedrooms, and focused work.

Comfort

Create calmer interiors with better concentration and rest.

Quieter Spaces, Better Living

Biruni Design provides tailored soundproofing solutions for homes, studios, offices, specialist rooms, and hospitality spaces across Singapore, helping create quieter, more comfortable, and more private environments.

WHY CLIENTS CHOOSE BIRUNI DESIGN

- Design-conscious detailing
- Solutions tailored to the actual source of noise
- Suitable for upgrades, fit-outs, and new interiors
- Editable layout so you can insert your own project imagery later
